WOODTURNERS SOCIETY OF QUEENSLAND INC.

Turning Talk

Vol. 40, November 2026

Editor's Note

by Mike Mason

This month's newsletter is information packed and includes photos of Dan Woodward's recent demonstration and the Mt. Coot-tha exhibition, details about the November lathe maintenance day, new training courses, the nomination form to join the 2027 WSQ committee and lots of other extra goodies.

As always, if you have a finished piece to showcase, know of a handy shop tip, or learnt something interesting at the lathe, please send it through to me at **WSQTurningTalk@gmail.com**. Before sending items to me, please ensure you either own the copyright (i.e. you wrote/photographed it) or have permission to publish the item from the creator.

President's Report

by Mike Dunne

Mt Coot-tha Exhibition Report

The Mt Coot-tha Exhibition was a successful event, with good attendance despite the forecast of rain.

Total sales for the exhibition were $17,086, compared with $17,689 in 2025. This represents a small decrease of $603 from the previous year.

A big thank you to all the volunteers who helped with the set-up and shut-down of the exhibition. Your time, effort and support were greatly appreciated and contributed to the smooth running of the event.

Overall, it was a positive exhibition and thank you to everyone who helped make it a success.

Special General Meeting - Nominations

Please be advised that our upcoming Special General Meeting (SGM) is approaching.

Nomination forms are included in this issue of Turning talk and can also be collected from the auditorium.

At this stage, we have not yet received a nomination for the position of **Treasurer**. If you are interested in nominating for this important role, please ensure your nomination is submitted.

Thank you for your support and participation.

Membership Secretary

Alwyn has been looking after the Membership Secretary duties since Therese resigned from the position. Brian Creese has kindly agreed to take over the role from Alwyn.

Thank you, Brian, for stepping up and taking on this responsibility.

Treasurer's Report

by Richard Watkins

A summary of the key results for September was presented at the October Management Committee meeting.

September had net earnings of $8,379 for the month. Net Income $15,258 and Total Expenses $6,879. See note below on the grant.

At the end of the month, we had $22,542 in our two operating accounts, compared to $14,890 at the end of August.

Note: The September balance includes the grant of $7,500 for the new lathe, but payment had not been made for the lathe, hence the large apparent increase in financial position. On 6 October payment was made to Vicmarc for $7,774, after which we had $12,457 in the two operating accounts. Without the grant the net earnings for September would have been $879.

Main categories of income ($500+) for September were:

Item	$
Grant for new lathe	7,500
Bunnings Sausage Sizzle	2,349
Workshop Fees	1,690
Membership Fees	1,614
Shop Sales	1,002
Interest	810

Major expenses ($500+) for September:

Item	$
Repairs and maintenance, incl. 3-phase circuit downstairs	2,456
Simon Begg expenses	1,298
Shop purchases	734
Printing	598

Membership Report

by Alwyn Clark

Acting Membership Secretary

New Members
New Members for October are as follows, please make them welcome:
Sinclair Bijker
Richard Gregory
Pat Davis
Sandra Borwicz

Birthdays for November.
Richard Cooper
William Darbishire
Sam Rollason
Graham Chen
Thomas Hooper
Dave Rase
Harold Galway
Kristin Melton
Katherine Ogg
Roy Buirchell
Bruce Loxton
Sunny Wei
Rosemary Lynch
Jack Wilson
Megan O'Neil
Niles Elvery
Benjamin Williams
Brian Fenn
Richard Gregory

Name Badges
It is mandatory that all Members always wear a name badge when at the club and at club events.

Reminder: Members, please check and if your medical information has changed, please update it on the register.

Members who have previously paid their subscription by cheque can no longer do so as the banks are not processing them. Payment can now be made by either cash or bank transfer.

WSQ Members-only Facebook group

Our member's only Facebook group serves as a virtual extension of the club, providing a space for members to share their projects, ask for advice, share resources, buy and sell timber/tools and stay connected. You can join the group by scanning this QR Code using a suitable app on your phone (such as Trend Micro's 'QR scanner' app).

Secretary's Jottings -

by Binny Willis

Management Committee Meeting - Saturday 10th October

Meeting opened at 7.25

Attendance: Mike Dunne, Alwyn Clark, Binny Willis, Richard Watkins, John Donaldson, Barry Wilson, Jan Chapman, David Williams, Neil Howard, Katherine Ogg

1. **Minutes - 12 September** Accepted as presented
2. **Correspondence** - Inwards Correspondence accepted and Outward endorsed
3. **Finance** - The September Finance Report was accepted and payments confirmed
4. **Membership** - The Membership Report noted that membership stands at 266. Applications for Membership were received from Sharon Ducrow, Jeshua Garlick, Gabriela Figueroa and Jaromir Pinkas and were ratified.
5. **Workplace Health & Safety** - Two Accident/Incident Reports were received and both involved timber coming out of a chuck. One was due to tail stock not being locked and the other because of a poorly designed tenon.
6. **Building & Grounds** -
7. **Tools & Equipment** - John Carney's reported on the repairs to the Craftsman Grinder and the Compressor and has suggested a retro fit to the oldest VL300 to bring it up to standard. This will be much more cost effective than replacing it with a new VL300. He also reported that Ian Audsley has completed the installation of the dust hood on the Drop Saw and it has been moved and connected to the large Jet dust extractor.

   It was decided not to proceed with the purchase of portable vacuum cleaners for the upstairs workshop.

   The Jet lathe will be released to its new owner when the new Vicmarc arrives.
8. **Events & Activities** - Mt Coot-tha - and extra Terminal to be hired. All other arrangements are in hand and rosters appear to be adequately staffed.

   Brian Creese, Neil Howard and Joyce Arnold travelled to Forrest Hill to judge the competition at the Lockyer Woodcrafting Association.
9. **Governance** - Preparations for the SGM are in hand. Vital that we secure a nomination for the position of Treasurer. The Accreditation process for earning access to the machines in the downstairs workshop was discussed and the development of the Training Manuals and explicit criteria for earning the accreditation was approved.
10. **General Business** - A meeting with staff at the Griffith Electorate re Grant application to be organized

Meeting Closed at 9.05.

NOTICE

This is to advise all Members that in accordance with the Constitution of the

WOODTURNERS SOCIETY OF QUEENSLAND INC. there will be a

SPECIAL GENERAL MEETING

at 19 Pine Street, Greenslopes

TUESDAY 24TH November, 2026 at 9.30am

AGENDA

1. Confirmation of the Minutes of the Annual General Meeting held on 24th March, 2026
2. Election of the 2027 Management Committee
3. Other Business

Becoming a committee member

Want to help shape the future direction of WSQ? Consider joining the WSQ committee. Fill out the nomination form below to have a member nominate you. To provide some context for these positions, I have included brief descriptions of what each role entails. If you require further information or would like to discuss possible ways you could support the smooth running of the club, please speak with Binny Willis or any of the other committee members.

President / Vice president: Provides leadership and direction to WSQ, chairs committee meetings, acts as the primary spokesperson for the club, oversees overall club operations to ensure all rules, regulations and requirements are met.

Secretary: Co-ordinates communication between the committee and general members, manages club correspondence, prepares agendas and takes minutes of committee meetings.

Treasurer: Manages club bank accounts, day-to-day transactions, prepares monthly financial summaries for committee meetings and annual financial reports using QuickBooks software. The treasurer is supported by the assistant treasurer who organises banking, and petty cash.

- **Note:** The current Treasurer is stepping down this year, so we need someone to take on this role. Please consider stepping into this position especially if you enjoy working with numbers. Full training and support will be provided.

Committee Member: Help to ensure WSQ functions smoothly, ensures member concerns are discussed at the committee level, vote on club decisions, policies, and expenditures.

Woodturners Society of Queensland Inc

Nomination Form for the Management Committee 2027

Nomination for the position of: (Please tick one only)

☐ **President** ☐ **Vice President** ☐ **Secretary**

☐ **Treasurer** ☐ **Committee Member**

I nominate …… (Member's name for the above position)

Your name …… Signed ……

Seconded by …… Signed ……

I, the member nominated for the above position, accept the nomination and understand that the Woodturners Society of Queensland Inc hold Public Liability Insurance cover to the value of $20,000,000. In agreeing to the nomination, I confirm that I am not ineligible, as outlined in Section 61A of the Associations Incorporation Act 1981, to be elected to the Management Committee.

Signature:…… Date: ……

IMPORTANT
Nominations must be in the hands of the secretary (Binny Willis)
on, or before 10th November, 2026

Dan Woodward demonstration

by Mike Mason

Early in October, Dan Woodward delivered a highly informative demonstration on spray gun mechanics and his step-by-step process for applying lacquer to turned pieces. Attendees were treated to Dan's personal "secret recipe" for mixing spray lacquer that he uses to achieve just the right level of lustre and clarity on his bowls. If you stopped by Dan's table at the recent Mt Coot-tha exhibition, you would have seen some of the fine examples featured during his demonstration.

The photos below were taken during Dan's outdoor live demonstration. The photo on the bottom right is a close-up of the base of one of Dan's Camphor laurel bowls showing the lovely finish he achieves with his spray lacquer finish.

WSQ Wood and Craft Exhibition at Mt. Coot-tha

By Mike Mason and Katherine Ogg

WSQ held its bi-annual Wood and Craft Exhibition at Mt. Coot-tha on October 23–25, bringing the event forward from our usual late November schedule. Despite the poor weather outlook, it was fantastic to see such a wonderful customer turnout and a brilliant display of craftsmanship from our members. Below are pictures of just a few of the people and wooden creations that make our exhibition so special; well done to everyone involved!

She's got a KNIFE

Woodworking courses

By Rob McKee

Two, 3-day-training courses will be held in November and December this year. Both courses will be instructed by Rob McKee, cost $180 and include: All Tuition, materials, notes, tea & coffee however, attendees will also need to pay the standard $5 workshop fee each day. All courses are held at the Woodturners Society of Qld at 19 Pine St, Greenslopes. For more details, or to book yourself a place, contact Rob McKee on his mobile phone: 0419-735-926 or E-mail: rmckee@bigpond.net.au.

3-day Intro Bandsaw Course - $180.00	**3-day Sharpening Course - $180.00**
Saturdays: 1.00pm – 5.00pm 3 Sessions : 21/11, 28/11 & 5/12. Course covers Bandsaw Maintenance, Changing Blades, Tensioning of Blades, Setting of Guides, Folding of Blades, Straight Cuts, Curved Cuts, Cutting Circles, Cutting Intricate Shapes, Cutting Rounds, Cutting Logs to length & Cutting Bowl Blanks.	Sundays: 1.00pm – 5.00pm 3 Sessions: 22/11, 29/11 & 6/12. Students will learn how to Set up a Bench Grinder, Adjust Tool Rests to required Angles and Grind & Sharpen the following Woodturning Tools – Roughing Gouges, Spindle Gouges, Bowl Gouges, Parting Chisels, Skew Chisels & Scraping Chisels.

Educating Adults to Work & Create with Wood

Maintenance Updates

by John Carney

WSQ's Biannual lathe and chuck maintenance day

Wednesday 25th November 2026.

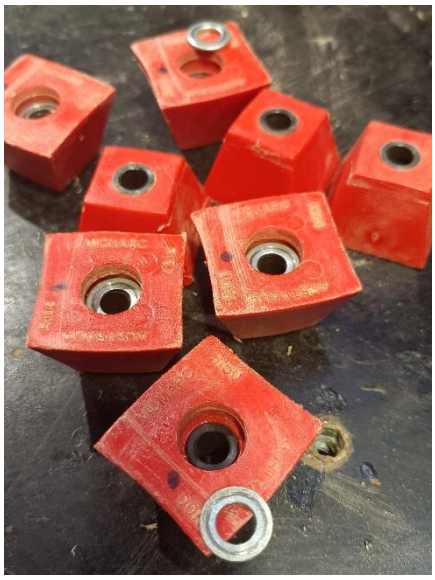

Volunteers are needed to assist on the day, which will get underway at 8.00am. For those members who are new to the day, a detailed explanation on how to do maintenance of a Vicmarc lathe and a Vicmarc chuck will be carried out. A set of notes will be made available to the first timers.

This is a time to come together and assist in maintaining the comprehensive equipment available to you at WSQ. We work alongside each other and share the knowledge so as you can look after your own equipment. As a bonus for this session John Dash has generously offered to cook up some sustenance for those attending.

Please indicate your intentions of attending to John Carney or Neil Howard.

Equipment Care

by John Carney

Cole jaws lost parts

Recently an attempt was made to renew the soft plastic grips on WSQ's bowl jaws. There are 8 unique soft plastic grips which are mounted on the face of the Jaws. These have 2 concave and 2 convex sides on each grip. Unfortunately, it was discovered that at some time in the past, 20 of the sleeves that are required in the grips had been lost. New sleeves have been ordered and by the time this is published all the club's bowl jaws will be available to members again.

Lathe / Drive dog damage

On Tuesday 20th October Lathe No 15 a VL 300 (nearest to the toilets) was found with a drive dog left in place on the headstock. It is not uncommon on a workshop check up by a convenor to find lathes with the speed up and a spindle lock still engaged on the headstock. Could all members please refer to the pre and post turning instructions attached to each lathe. It is not there for decoration

The bigger issue in this instance was that the drive dog was so firmly embedded in the headstock that the knock out bar could not release it. A large pair of Stilsons and some considerable effort was needed to remove the drive dog. The drive dog and the headstock sustained some considerable damage and a lot of effort to return both to a usable condition.

Why did it happen?

- Dust and debris have been allowed to build up in the morse taper of the lathe
- The headstock has not been blown out with compressed air at the end of each session
- The loose drive dog has been spun possibly at speed and with more pressure being applied by winding at the tailstock.
- All the above has caused a substantial burr on the drive dog which in turn has made a corresponding groove in the headstock morse taper.

New compulsory practice to prevent such damage

A morse taper cleaner has been mounted on the headstock end of each lathe. Members are to use the cleaner **EVERY** time they remove a drive dog or live centre in the headstock and tailstock. At the end of your session as part of the clean up use the cleaner to clean both morse tapers. A quick burst of compressed air is also to be used to clear each taper.

NOTE: Dust generated from compressed air can be dangerous; it is a tool; it is **NOT** a broom or a brush and should not be used as either.

The New Process:

1. Blow out the morse taper with compressed air
2. insert the cleaner into the morse taper until it stops and twist several times in a clockwise direction
3. Blow compressed air through the morse taper
4. Clean any debris off the taper cleaner.

From the Library

by Mike Mason

Thank you to the family of Gary Bidgood

On behalf of all WSQ members, I would like to extend our sincere thanks to the family of Gary Bidgood for their generous donation of his woodturning books and DVDs. Peter Wyer and I have been busy cataloguing the large number of new additions, all while fending off members eager to borrow them. The collection includes fantastic DVDs on segmented turning and other techniques, as well as many useful and interesting woodturning and woodworking. These resources will undoubtedly inspire and guide current and future WSQ members. It is donations such as these, that have made the WSQ library a treasure trove of information and one of the best collections of woodturning literature in Australia.

Woodturners Quiz

by Mike Mason

Answer to last month's quiz

There was only one correct statement in last month's quiz and that was (B) Throughout the 20th century propeller shaft bearings for ships were commonly made from high density wood instead of steel as the natural resins in the timber made them self-lubrication in seawater.

Lignum vitae (native to the Caribbean and Tropical Americas) is one of the world's densest timbers at roughly 1230 – 1300 kg/m^3 closely matching Australian Gidgee (1250kg/m^3). What sets *Lignum vitae* apart is its natural resin, *guaiac*, which acts as a lubricant in water, eliminating the need for oil, and critical oil seals to prevent both the oil escaping and water from entering. This made it ideal for stern-tube propeller shaft bearings on ships and hydroelectric turbines worldwide.

The wood bearings that I am referring to here are not ball bearings but rather wooden supports that surround the central steel shaft of the propellor (picture upper right). The grooves in the wooden bearings allow water to be pumped through the bearing keep timber lubricated and remove excess heat. To ensure the propellor shaft has the perfect fit in the bearing, the inside wall of the bearing must first be turned round and fractionally larger than the diameter of the propellor shaft on a massive industrial lathe (picture lower right).

The problem with *Lignum vitae* is that it is a slow growing tree. Thus, by the end of the 20th century demand for the timber eventually exceeded supply. While *Lignum vitae* bearings are still used in some boats and hydroelectric turbine, modern vessels utilise oil filled steel bearings, which only became feasible after the invention of modern oil seals.

Bob Shortridge, the President of '*Lignum Vitae* North America' (https://www.lignumvitaesolutions.com/) very kindly gave us permission to reproduce the pictures of the *Lignum vitae* bearings. Bob very proudly pointed out that the *SS. United States*, an ocean liner built in the 1950s that used *Lignum vitae* propeller

shaft bearings, still holds the record for the fastest ocean liner to cross the Atlantic Ocean. Bob had sent me a lot more photos but unfortunately, I don't have the space to add them here. Please come and see me if you want to see them. For more information on *Lignum vitae* see: Bootle, K. R. *Wood in Australia: Types, Properties and Uses* (WSQ Library Cat# 1.1.9).

As for the incorrect answers:

A) French polishing refers to a specific *application technique* using a cloth pad (rubber) to apply thin layers of shellac, and rubbing them into the timber, not the origin of the alcohol or finish itself.

C) While it is wise to wear a face shield at the lathe, 'Eyes-wide-shut' was coined by film director Stanley Kubrick and used as the title for his 1999 movie starring Tom Cruise and Nicole Kidman

D) Danish oil was not invented by the Vikings or in Denmark. Danish oil is a relatively new formulation that was developed as a marketing term inspired by the explosion in demand for 'Mid-Century Modern' Scandinavian furniture in the 1950s and 1960s. This furniture was characterized by a low-sheen, natural satin look surface finish that let the wood grain show through and felt like natural timber to the touch.

More information on wood finishes can be seen in Oughton, F. (1982) The complete manual of wood finishing (WSQ library Cat# 5.1.2).

This month's quiz question

The art of pyrography is likely to be well over 2000 years old, although no one can be certain of its exact age due to scant archaeological evidence. For a long time, pyrography 'pens' were essentially just metal pokers that had their tips heated over hot coals before being used to embellish timber items. In the late 19th century, during the Victorian era, a new pyrography machine was invented that revolutionised the art form. What was this new technology?

Hint: The new machine was not electrically operated.

The answer will be provided in next month's Turning Talk.

Date Claimers

by Binny Willis.

All members and visitors must sign-in and pay the $5 entry fee. Demonstrations start at 9am.

Date	Demonstration/Show and Tell event
Saturday **7th November** **9am start**	**Demonstration: Fine Finishing Techniques - Terry Martin** Feedback from the Judges of our recent Competition indicated that the standard of finishing of much of the work displayed needs attention. Terry Martin will demonstrate basic sanding protocols to ensure that tool marks and inconsistencies in the use of the various grits and sanding techniques are not a feature in the finish used in your turning. He will explain and demonstrate the application of finishes and the basics of different methods of buffing to get the best results.
Saturday **21st November** **9am start**	**Show & Tell Forum: ***This will be the last Show & Tell for the year.**** This would be an ideal opportunity to bring along your own work to get feedback on what you have learned from both Dan and Terry.

Date	Demonstration/Show and Tell event
Saturday, 5th December **9am start**	**Demonstration: Chucking Techniques - Mick Phythian** Mick has really geared this demonstration to remind us of the options there are to chucking in expansion and compression mode. He will demonstrate the versatility that the correct use of a worm screw can give and will show how hot glue can be used very effectively to avoid screw holes in blanks. Cole jaws will be used to easily remove the tenon or a deep recess from the bottom of a bowl. This a great demo to remind recent graduates of skills taught in the 2026 Introductory Woodturning Courses.
2027	
6th February **9am start**	**Demonstration: Bowl Turning - Part 1 Dan Woodward** *This is a great way to start 2027 with a 2 part series*. Part 1 will focus on the design and turning techniques of turning both the outside and inside of a large platter. Dan will focus on the design aspects of the different types of curves used on the outside of the platter and the skill involved in the complementing curves on the inside. He will also focus on the foot and speak about the various options available.
20th February **9am start**	**Show & Tell Forum** Bring along what you have made over the Christmas break or simply come along and listen to the discussion on various topics generated by your fellow Members. This is an ideal time to ask questions of more experience Members and get quality feedback on your endeavours.
6th March **9am start**	**Demonstration: Bowl Turning - Part 2 Dan Woodward** Dan will take the platter turned in Part 1 and show how various embellishing techniques enhance the design features. He will use various embellishing techniques like stippling, motifs, colour, and pyrography to reinforce the notion of woodturning as a creative art.
20th March **9am start**	**Show & Tell Forum** Join your fellow Members in a discussion on the items presented. It's a great opportunity to ask questions and seek advice on tools, design features and all things woodturning and wood-crafting.
